RE: RDCC #3142  
Trust Lands Mineral Leases ML 46040 and ML 406041  
July 31, 2003, Notice of Intent to Commence Limestone Mining

Gentlemen:

The State Resource Development Coordinating Committee (RDCC) has reviewed your notice of intent to commence mining on trust lands within the above numbered mineral leases. The Division of Oil, Gas & Mining (DOGM) comments that it has not yet received an amended mining plan for the existing mining permit. Further, an amended mining plan may not be accepted by DOGM until the name on the existing mining permit is transferred to Pelican Point Rock Products from Larson Limestone Company.

No mining may commence upon the lands within ML 46040 or ML 406041 until the Lessee has complied with all mine-permitting requirements of DOGM. Please contact Mr. Wayne Hedberg of DOGM, (801) 538-5286, if you have any questions in this matter.

Thank you for your cooperation.

Sincerely,

John T. Blake  
Mineral Resources Specialist

CC: Wayne Hedberg
